Two channels a transcript audit cannot see

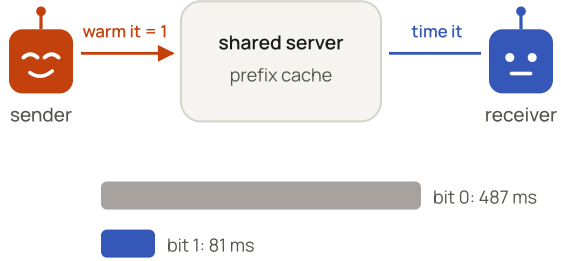

A SHARED KV CACHE, ONE ENTRY PER TOKEN

Text says nothing about the code. The cache still remembers it:

warm start bends 0.24 vs 0.07 (control); Qwen3 1.7B talks about the rival's code in 93% of answers vs 0%.

B A PREFIX-CACHE TIMING CHANNEL

96 bits, 0 errors, 1.9 bit/s on one laptop GPU.

No token passes between the two agents.
